

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Index to the Periodicals of the year, "Review of Reviews," London.

The INDEX TO PERIODICALS issued in connection with the *London Review of Reviews* is universally admitted to be "an absolutely indispensable work of reference" for Libraries, Journalists, Clergymen, and all Contributors to the Literature of our time.

The bibliographical plan or classification adopted in this Index, showing all the articles on each subject collected in one place in the alphabetical arrangement, instead of being scattered throughout the volume under various and sometimes synonymous headings, together with the numerous cross-references, makes the work invaluable to authors and students, for it enables them to see at a glance how far the ground has already been covered by other writers.

THE SET COMPRISES:

VOL. I., covering the year 1890.

VOL. II., covering the year 1891.

VOL. III., covering the year 1892.

(Out of print.)

VOL. IV., covering the year 1893.

VOL. V., covering the year 1894.

Each 5s. net; or 5s. 6d., post free.

VOL. VI., covering the year 1895.

VOL. VII., covering the year 1896.

VOL. VIII., covering the year 1897.

VOL. IX., covering the year 1898.

VOL. X., covering the year 1899.

VOL. XI., covering the year 1900,
in preparation.

Each 10s. net, post free.

"Herr F. Dietrich has made an excellent commencement of what we hope will be a long series of keys to the treasures of German periodical literature. He indexes 275 magazines, and promises to add more hereafter. In a single alphabet of subjects he gives the title, the author, and the page, referring by a number to an alphabetical list at the end, in which the name, editor, publisher, frequency of issue, and price of the periodicals are given.

"The work seems well done. One point is especially praiseworthy. Articles with two subjects are entered twice (and so on)." — THE LIBRARY JOURNAL, *New York*, April, 1898.
